

Wards

Should your pets require hospitalisation, you can feel confident they are safe and comfortable during their post-operative care, treatment or recovery period. Our team of qualified staff, also provide gentle reassurance for your pets while they are away from home.

Pharmacy

We stock many high quality products for your pets' general healthcare from flea treatments to toothpaste. Special prescription diets are available to help with conditions such as arthritis, obesity or allergies. Should your pet require medication or repeat medication and

you wish to obtain either of these from another source, we are happy to provide the appropriate prescription for which a charge will be made.

Pet Insurance - for peace of mind

Accidents and sudden illness can happen to your much-loved pet when you are least expecting them and at such an anxious time, it is comforting to know that we are here. Modern veterinary medicine, allows diagnosis and treatment for a wide range of conditions. However, this can often incur expensive procedures, and the last thing you need is the added worry of costs. You may wish to consider life-long insurance for your pet. Instead of worrying about the financial expense, you can relax knowing that your chosen insurance company can help to cover the cost. There are many policies available and they are all different, so it is very important to read them thoroughly to see exactly what they include.

Compassionate care for you and your pets

At Hillpark Veterinary Group we like to see healthy pets and happy owners, so our professional, friendly and experienced team of staff constantly work to ensure that we provide high quality veterinary care and client service. Our excellent facilities enable us to diagnose and treat your pets quickly and accurately, and we offer that all-important preventative healthcare, from free nurse clinics to a reassuring chat.

As pet owners ourselves, we fully understand how important your pets are to you. So you can feel confident that whether major surgery or routine vaccinations are required, your pets are not only receiving the very best in veterinary care, but also love and kindness while visiting our surgeries.

This well-established practice began its life in 1985, with our Harold Hill branch, followed shortly after by Elm Park. Both surgeries are ideally situated to serve the areas around Hornchurch and Romford, are easily located and have ample free parking.

You can be assured that our team are fully committed to the well-being of the animal community. We look forward to welcoming you and your pets into our world of animal care.

Fully Equipped Operating Theatre

Our sterile theatre houses a complete range of equipment for a comprehensive range of surgical procedures.

X-Ray enables us to see fractures, arthritis and cruciate problems, or the rather unusual objects that pets do have a tendency to swallow.

Free Nurse Clinics

Our team of highly experienced Veterinary Nurses can offer you guidance on a wide range of preventative healthcare, such as flea, tick & worm treatments, vaccinations, diet and exercise. They can even show you how to clean your pet's teeth. For those pets who need to lose a few extra pounds, pop them along to our ChubClub.

Vaccination

This helps to protect your pets against infectious disease, and provides an opportunity for the vet to carry out a full health check.

Dental Care

Bad teeth can lead to gum disease and smelly breath. We offer a complete descale and polish procedure, and can help you keep your pet's mouth in tip-top condition.

Microchipping

This permanent means of identification helps reunite lost pets with their owners.

PETS Passport

It is quite simple to obtain this document, to travel abroad and return to the UK, with your pet. We can help you through the process.

Ultrasound Scanner

This shows us the inside of your pet's body as it is actually functioning, and we can see in far more detail, the organs and soft tissue.

In-House Laboratory

This facility provides us with equipment to perform a wide range of diagnostic tests to give us full, accurate results, and you the pet owner answers, within hours. The quicker we can diagnose the problem - the sooner treatment can begin.

Veterinary Surgeon and Director
Mike Malone MVB MRCVS

"Just as animals are now very much a part of my daily life, so were they when I was a child. Dogs, cats, horses, cattle, sheep and pigs, were quite a usual sight for me on the family farm in Tipperary, Ireland. Regular visits from the local vet, gave me my first taste and interest in veterinary medicine, as I would accompany the vet on his rounds to help fetch and carry. So it was quite a natural progression for me to study animal medicine at Dublin University, from where I qualified as a Veterinary Surgeon.

In 1984 I came to the UK and settled in Essex working as a locum vet, however, it was not too long before I wanted to begin my own practice. Twenty-five years on, I now have two surgeries under my wing, and still continue working very hard at maintaining and improving the small family nature of my practices.

My favourite part of the job is working on Sundays and 'out of hours', as it allows me more time to spend with pets and my clients. I'm soon to adopt a rescue dog, and plan to stay living in the UK, as I love the variety and the beauty of this huge country!"

Mike Malone
