

**Nurse Clinics** Our Veterinary Nurses offer help, encouragement and advice towards your companion's general healthcare. For those pets who need to shed a few pounds, we can provide guidance on diet, suitable exercise and regular weigh-ins. New arrivals have fun and games at our weekly Puppy Parties, and also learn those very important social skills. Help is available with behavioural problems, and our older members of the animal world can visit our Senior Wellness Clinic. For more information call us or pop in for a chat.

**Our Pharmacy** holds a wide range of pet healthcare products from flea treatments to toothpaste and high quality diets.

**The My Vet Group  
Pet Health Club**

You may wish to consider this as an economical alternative to pet insurance. We have a number of plans within our club to help you cover, spread and save on the cost of your pet's routine and emergency healthcare. Please ask at reception for full details.

**Surgery Hours**

**Monday to Friday**  
8.30am - 6.30pm

## Nose to Tail Care

Welcome to Pilgrims Veterinary Clinic, where our door is open not just for when your pets are poorly, but also for help, advice or even a reassuring chat whenever you have concerns about your much-loved family member. From vaccinations to major surgery, you can feel confident that we are here to provide your pets with all the expert care they deserve. Our dedicated and professional team of vets and nurses understand why your pets are important to you, so we offer clients a friendly and more personal service. Guidance and encouragement are readily available on that all-important preventative healthcare, to help keep pets in the very best of health. Our aim, as always is to provide first class veterinary treatment at a reasonable cost. We look forward to meeting you both at our clinic, and to becoming a partner in your pets' lifetime of care.

## Where We Began

Our small practice with the big heart was founded in 1999 by vet Graham Hines at former premises in Kemsing. Due to redevelopment by the landlord of our first surgery, a move became necessary. We felt it was the perfect time for a brand new building, and with a site in mind in West Kingsdown, plans for a purpose built surgery were put in to action. Constructed and completed in 2008 with the grand opening in January 2009, the facilities it provides are excellent for a practice of our size.

**Veterinary Surgeon**  
**Graham Hines BVSc MRCVS**

Qualifying from Liverpool University in 1981, he has gained a great deal of experience over the years as a small animal vet. Graham is constantly increasing his knowledge to ensure the provision of the most up-to-date treatments and care for your pets. His particular interest in holistic medicine, enables him to apply this in addition to conventional veterinary medicine and surgery. Judith, his wife, is Head Veterinary Nurse at the practice and as both live on site, they are able to keep a close watch on in-patients.

## In sickness...

Our modern surgery is fully equipped to assist us in identifying and treating your pets' quickly and accurately.

**Consultation Rooms** provide a calming and private environment, where you can discuss any concerns you have about your pet, and an initial assessment of any health problems can take place.

**Prep Room** To prepare your pet for their treatment before going into theatre, or other forms of care.

## Fully Equipped Operating Theatre

Our theatre houses a complete range of equipment for a wide range of surgical procedures.

**In-House Laboratory** We can perform a wide range of diagnostic tests to provide us with accurate results in a few hours - some within minutes.

**Canine and feline hospitalisation wards** provide safety and comfort for patients during their recovery period.

**Digital X-Ray Machine**  
**Ultrasound Scanner**  
**Latest Air Operated**  
**Dental Equipment**

## ...and in health

We encourage all aspects of Preventative Healthcare to help keep pets healthy and happy  
**Annual Vaccinations & Healthchecks**  
**Flea & Worming Control - Dietary Advice**  
**Dental Check-ups & Cleaning - Weight Control**

**Microchipping** Protect your pet against loss with this simple permanent means of identification.

**PETS Passport** Want to travel abroad with your pet? We can help you through the process to obtain the necessary documents.

## Complementary Medicine

Graham Hines specialises in the alternative treatments of **Acupuncture & Homeopathy** Studying for three years with the HPTG and ABVA, he holds the Certificate of Safety and Competence in Veterinary Acupuncture, and is a licensed associate of the Faculty of Homeopathy. Graham can offer referral or first opinion service in Homeopathy, and his holistic approach to animal care extends to advice on natural nutrition on raw and home cooked diets for optimal health.
